The Renfrew Center Foundation is dedicated to eliminating eating disorders by advancing education, prevention, advocacy, research and treatment. Our seminars are designed to help healthcare professionals develop skills in the prevention, assessment and treatment of behavioral and emotional disorders in women.

The Renfrew Center Foundation, a non-profit organization, was the first in 1991 to host a national conference about eating disorders. The Foundation has presented seminars in dozens of cities across the country and, to date, has trained more than 35,000 professionals.

This fall, we have planned 2 advanced training seminars that address core issues in the treatment of eating disorders.

Seminar 1

THE FALSE SELF: THE COMPLEXITY OF BODY IMAGE AND IDENTITY ISSUES IN THE TREATMENT OF EATING DISORDERS

Adrienne Ressler, LMSW, CEDS, F.iaedp

Body image is perhaps the least understood and most complex of the core issues associated with eating disorder treatment. As an integral part of the life cycle, body image development shifts and adapts as we age and engage in life experiences. It is ironic that although our clients are focused on and obsessed with their bodies, they remain virtually disconnected from the experience of living in their bodies.

This seminar will address the intricate interplay between brain, body and beliefs (why we believe what we believe). Repetition of messages and experiences become internalized and influence, not only self-perception and self-talk, but the body itself. Negative reinforcement often becomes imprinted in the client’s bodymind, feels “true” and serves as the client’s identity.

Attendees will learn body-focused, bottom-up strategies designed to help clients reclaim their authentic self. Lecture, demonstration/experiential exercises and video clips will be utilized and attendees will be provided with a resource packet.

Seminar 2

GETTING TO THE HEART OF EATING DISORDERS: USING MINDFULNESS TO PROMOTE EMOTIONAL AWARENESS

Jancey Wickstrom, AM, LCSW

Mindfulness is an oft-used term in today’s society. We are encouraged to feel, eat, play, and work mindfully – but what does that really mean? This daylong workshop addresses how to use mindfulness in a way that is effective in clinical settings as well as in relationships. This seminar will initially focus on defining and discussing the benefits/limitations of mindfulness and help attendees learn to implement mindfulness into daily life and work. This will be followed by in-depth training on how the mindful experience of emotion can be a foundational tool in eating disorder recovery. Using real life examples from The Renfrew Center Unified Treatment Model for Eating Disorders™, participants will learn to empower themselves and clients to become mindfully aware of emotional experiences. This process lays the groundwork for the difficult, yet ultimately rewarding, journey towards full recovery.
