The Renfrew Center Foundation is dedicated to eliminating eating disorders by advancing education, prevention, advocacy, research and treatment. Our seminars are designed to help healthcare professionals develop skills in the prevention, assessment and treatment of behavioral and emotional disorders in women.

The Renfrew Center Foundation, a non-profit organization, was the first to host a national conference about eating disorders beginning in 1991. The Foundation has presented seminars in dozens of cities across the country and, to date, has trained more than 25,000 professionals.

This winter, we have planned advanced training seminars that address core issues in the treatment of eating disorders.

Seminar 2
Adrienne Ressler, LMSW, CEDS, Fiaedp

Body image is perhaps the least understood and most complex of the core issues associated with eating disorder treatment. As an integral part of the life cycle, body image development shifts and adapts as we age and engage in life experiences. It is ironic, and adds to the difficulty of treatment, that our clients are focused on and obsessed with their bodies yet are virtually disconnected from experiencing their own bodies. This seminar will address the intricate interplay between brain, body and beliefs (why we believe what we believe). Repetition of messages and experiences over time become internalized and influence not only self-perception and self-talk, but the body itself. Negative reinforcement often becomes so familiar that it feels “true” and, thus, is taken on by the client as her identity and imprinted in her bodymind.

Attendees will learn body-focused strategies designed to help the client reclaim her “authentic” self and recover connection to her body. This seminar will utilize lecture, demonstration and experiential exercises, and video clips of work with clients.

Additionally, a resource packet including hands-on tools will be provided.
